Integrated Technologies and Services for Sustainable Growth European Economic Interest Grouping (EEIG)

Integrated Technologies and Services for Sustainable Growth European Economic Interest Grouping (EEIG)

What is a European Economic Interest Grouping?

The only transnational legal instrument - founded on Community law - for cooperation between companies or individuals.

A yellow background graphic with a blue and white grid pattern. At the top, the text 'What is a European Economic Interest Grouping?' is written in a dark red, serif font. Below the text is a small image of the European Union flag. A large, red-outlined oval contains the text 'The only transnational legal instrument - founded on Community law - for cooperation between companies or individuals.' in a dark red, serif font. Below the oval are several blue silhouettes of business people in professional attire, some holding documents. In the bottom right corner, there is a small green square with the 'iAROW' logo in orange.

Its time to up the incentive!

What is an EEIG?

A legal entity of private law endowed with legal autonomy, the EEIG is an instrument which allows legal entities from various Member States and Associated Countries to develop certain joint activities in order to create synergies between themselves via a form of grouping or association. In its communication on the Participation of the European Economic Interest Groupings in public contracts and in programmes financed by public funds, the European Commission qualifies the EEIG's "flexible and light structure... whose purpose is to facilitate or develop its members' economic activities and to improve or increase the results of those activities".

Its time to build the team!

Background

The creation of a European company structure has been under discussion for a number of years. In fact the first proposal for a Council Regulation to legislate for a European company dates back to 1970. In 1991, proposals for a Council Regulation were made for the creation of a European co-operative society and a European mutual society.

It has always been possible for a European firm or an individual wishing to establish cooperation to carry out an exchange of information or experience, etc, with a professional (company or individual) from another European Community country, to create a joint venture, to merge or to conclude an association agreement or "private" grouping. However, these various forms of cooperation do not establish any external, separate, representative legal entity.

In 1985, the Council created - by means of a regulation (applicable since 1 July 1989) - the European Economic Interest Grouping (EEIG) . This is now the only transnational legal instrument - founded on Community law for cooperation between companies or individuals.

WE ARE DIFFERENT

igROW

- ▶ **RAISE AWARENESS OF RESEARCH AND INNOVATION POLICIES. WE EXPLORE THE .PROS AND .CONS FROM A NON BIASED PERSPECTIVE**
- ▶ **WE PROMOTE THE ACTIVITIES OF OUR MEMBERS IN THEIR BEST INTEREST**
- ▶ **WE BELIEVE THAT WORLD RESOURCES ARE ABUNDANT. WE JUST NEED TO UNCOVER THEM AND DISTRIBUTE THEM EQUITABLY**

Building
Education and innovation
Capacity for the future

Serving A Triple Helix

integrating sustainable growth areas in teaching programs including information and communication technologies, engineering, environment and other related areas

the development of teaching materials and the production of publications in electronic format (CD, DVD, other digital media content) and non electronic format (books, reports, leaflets, artistic info design)

Building Education and Innovation

Capacities for the Future

We provide a wide range of support to Higher Education Institutions

bridging a wide knowledge gap in vital areas related to sustainable growth (water, energy, environment, eco and active life style, and related enabling technologies)

Using innovation to face the global threat of scarcity in water resources and the struggle to identify new sources of energy

integrating sustainable growth areas in innovation and strategic development programs.

the production of publications in electronic format (CD, DVD, other digital media content) and non electronic format (books, reports, leaflets, artistic info design) to promote wide outreach

Building Education and Innovation

Capacities for the Future

We provide a wide range of support to Public Authorities and Agencies

bridging a wide knowledge gap in vital areas related to sustainable growth (water, energy, environment, eco and active life style, and related enabling technologies)

Using innovation to face the global threat of scarcity in water resources and the struggle to identify new sources of energy

New member

Clever idea to join IGROW EEIG

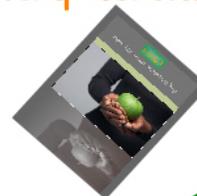

Sign and stamp IGROW EEIG membership form and send it to us by email @ or air mail

IGROW EEIG will register your membership with the CRO Company Registration Office in Dublin and announce your membership in the Irish Official State Gazette

IGROW EEIG will send your certificate of membership by post and you will enjoy various membership benefits

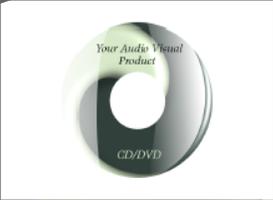

Well done

Benefits from Membership

1 **Audio Visual Product**
We work together to produce for you a tailored audio visual product (book, CD, Web page, video, DVD).

2 **Policy Report**
We study and assess your needs and leverage our pool of expertise to produce a consolidated policy report guiding you in your future activities.

3 **Promoting Your Activities**
We will be a regional hub to promote the activities of our members and expose their profile to selected expert communities.

4 **Access to our knowledge base**
You will have full access to the knowledge base about our grouping activities, the activities of its members, and the various market and research intelligence reports produced by our grouping.

5 **Raising Awareness**
You will be updated of the latest research and development in Europe and across the globe in our focus research areas.

Our Expertise

Our pool of expertise is drawn from leading industry, academia, public and private sectors. We strive to offer you the cutting edge knowledge and expertise tailored to your needs.

Our Focus Areas

Our main areas of focus are topics vital for sustainable growth including water, energy, eco and active life style, mega investment opportunities. We believe in technology as an enabler and a driver of change.

Standards and Quality Assurance

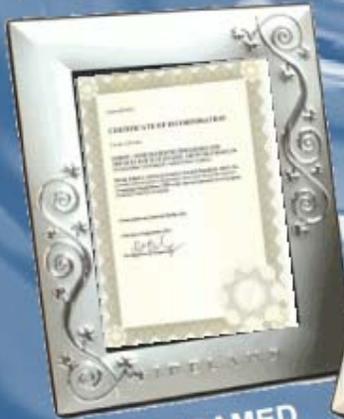

Our main warranty for success is maintaining the highest standards and insuring the best quality of delivery.
